

QUOTATION

PSMAS Phase 1 Foundation WhatsApp Chatbot

Prepared for	Premier Service Medical Aid Society (PSMAS)
Quotation reference	INTEL-PSMAS-2026-01
Date	19 August 2026
Validity / Currency	30 days / United States Dollars (USD)

Intel Technologies is pleased to submit this fixed-price quotation to design, configure, test and deploy the PSMAS Phase 1 Foundation chatbot on WhatsApp. The solution will adapt our existing chatbot foundation to the approved PSMAS journeys, content, controls and reporting requirements.

1. Fixed Implementation Price

No.	Implementation item	USD
1	Discovery, project plan, architecture and detailed journey design	1,500
2	WhatsApp onboarding, structured menus and core chatbot configuration	4,250
3	Approved knowledge base, FAQ migration, search, versioning and admin controls	3,250
4	Query and complaint logging, reference numbers, routing and case dashboard	3,100
5	Static provider/branch lookup, reporting, exports and audit trail	2,300
6	Agent/callback handoff, after-hours rules, fallback handling and CSAT	2,050
7	Security configuration, UAT, training, documentation, go-live and 30-day hypercare	3,250
TOTAL PHASE 1 IMPLEMENTATION		19,700

Fixed chatbot implementation total: US\$19,700, excluding ongoing support, VAT and third-party usage charges.

2. Included Phase 1 Scope

- WhatsApp menu with up to 10 top-level options, buttons/list messages, keywords, synonyms and a two-attempt fallback path.
- Approved-content-only FAQ responses, controlled publishing, content review dates, version history and bulk import templates.
- General query and complaint logging with reference numbers, categories, priority, assignment, status, audit history and CSV/Excel export.
- Static provider and PSMAS/PSMI branch lookup by province, town and service type, including no-result handling and data-version dates.
- Human handoff/callback, after-hours routing, conversation summaries, role-based administration, operational reports and satisfaction ratings.
- Privacy controls, encryption, retention, backups, monitoring and audit logs, plus UAT support, training, guides, go-live and 30-day hypercare.

3. Ongoing Support and Hosting

The following recurring charges begin after the included 30-day go-live hypercare period.

Recurring service	Monthly USD	Annual USD
Managed cloud hosting, backups, monitoring and platform availability management	450	5,400
Application support and maintenance SLA, security patches and up to 8 hours of minor content/configuration changes per month	850	10,200
TOTAL RECURRING SUPPORT	1,300	15,600

Support Service Levels

Severity	Initial response	Coverage / target
P1 - Critical outage	1 hour	24/7 remote escalation; workaround target within 4 hours
P2 - High impact	4 business hours	Business hours; workaround target within 1 business day
P3 - Normal incident	1 business day	Business hours; fix in the next practical maintenance release

Severity	Initial response	Coverage / target
P4 - Service request	2 business days	Scheduled by agreement; minor changes use the included monthly allowance

Support hours: Monday-Friday, 08:00-17:00 CAT; P1 has 24/7 remote escalation. Named contacts and an escalation matrix are issued before go-live.

4. Third-Party and Usage Charges

- Meta WhatsApp Cloud API or Business Solution Provider conversation/template charges are billed directly by the provider or passed through at cost.
- Any approved AI/LLM usage, premium reporting service or external licence is usage-based and requires prior PSMAS approval.
- Avaya, CRM, voice/SMS or other third-party licence fees are excluded. Standard API/webhook handoff is included where PSMAS provides documented and accessible interfaces.
- All quoted amounts exclude VAT or statutory taxes where applicable.

5. Delivery and Payment

Item	Commercial term
Delivery period	72 hours from contract award, kickoff and receipt of required PSMAS inputs.
Payment	40% on award/kickoff; 40% on delivery to UAT; 20% on go-live/sign-off.
Warranty / hypercare	30 days after go-live, included in the implementation price.
Change control	Material scope changes and non-Phase 1 integrations are estimated and approved separately before work starts.

6. Assumptions and Exclusions

- PSMAS will provide approved FAQs, policy wording, provider/branch files, routing rules, privacy wording, operating hours, escalation contacts and timely UAT decisions.
- PSMAS will provide or authorise the WhatsApp Business account/number and access needed for Meta/BSP onboarding.
- Phase 1 launches in English and is architected for later Shona and Ndebele content. Translation and approval of language content remain a PSMAS responsibility unless separately requested.

- Real-time claims status, dynamic balances/benefits, payment processing, OCR document validation, certificate generation and medical advice are outside Phase 1.
- Agent handoff will use the approved live-agent API/webhook where available, with callback/case-dashboard routing as the controlled fallback. Custom Avaya work beyond documented standard interfaces is separately quoted.
- Hosting location, retention period and any third-party AI processing will be finalised with PSMAS security approval before production deployment.
